ORANGE ANGLICAN GRAMMAR SCHOOL

Year 12 Assessment Schedule

HSC 2022 - 2023

Assessment For Learning

Assessment for learning is an integrated part of the teaching and learning programs provided to students at Orange Anglican Grammar School. Assessing student achievement is the process of collecting information about student performance in relation to the outcomes and course objectives.

Syllabuses developed by NESA and implemented in NSW schools advocate Assessment for Learning. This type of assessment gives students opportunities to produce work that leads to a development of their knowledge, understanding and skills. A variety of assessment strategies are used in such learning.

Principles Of Assessment For Learning

Assessment for learning tasks are designed to promote individual learning. They clearly explain the purpose and goal of the task being undertaken. They are designed in such a way as to help the student learn better, rather than just achieve a better mark. Assessment for learning tasks provide meaningful feedback which enables the student to grow in their understanding of how they learn – such tasks are not just content-driven. These tasks encourage students to take responsibility for their own learning.

The Assessment Calendar

Occasionally the scheduling or nature of tasks may change owing to unanticipated factors in the calendar. If any change does occur, students will receive adequate notice, written or digitally from the classroom teacher.
